Classic Add-Up Pyramids

Free sampler · 6 puzzles · answers on the last page

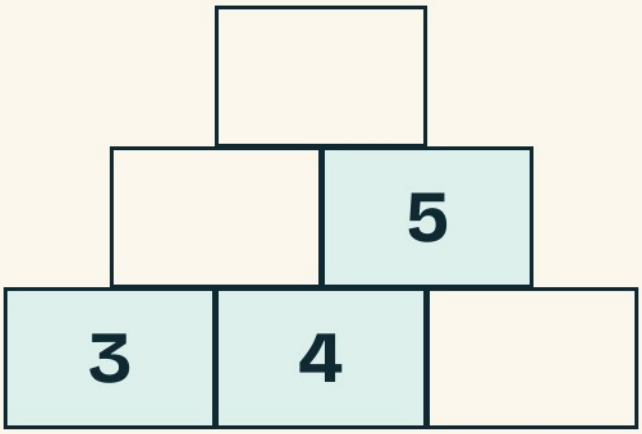

Each brick is the sum of the two bricks directly under it. Every bottom brick is a whole number from 1 to 9. Fill every empty brick.

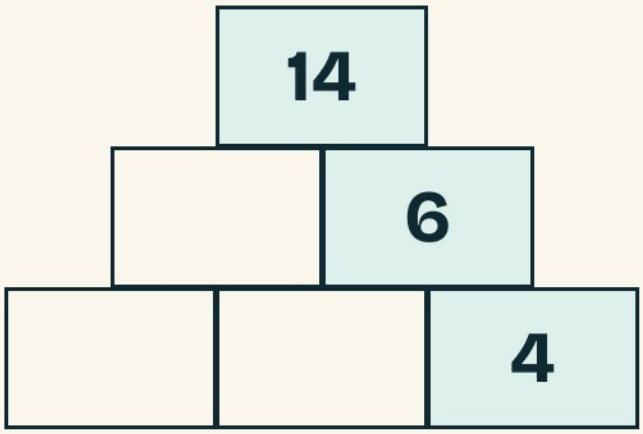

Worked example. The top is 39 and the right brick under it is 18, so the left one is 39 − 18 = 21. 18 is a sum of 10 and a brick: 18 − 10 = 8. And 21 is a sum of a brick and 10: 21 − 10 = 11.

Hint: when a brick and one of its two lower bricks are known, take away to find the other.
