Aluminum: Element 13

Other metals · where it is, what it does, how to stay safe

13

Al

Aluminum

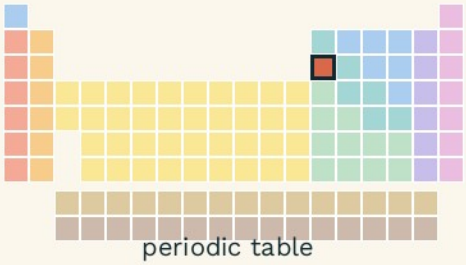

WHERE YOU FIND IT

- Drink cans and foil
- Bicycle frames and airplanes
- Pots and window frames

WHAT IT DOES FOR US

Aluminum is light, strong for its weight and does not rust. It can be recycled again and again, using far less energy than making new metal.

WHERE IT SITS

periodic table

FUN FACT

Recycling aluminum uses about 95% less energy than making it from ore.

SAFE TO KNOW

Foil and cans are safe to handle. Cut edges of cans can be sharp, so take care.

Adults: never let children mix, heat or taste chemicals.
