Neon: Element 10

Noble gases · where it is, what it does, how to stay safe

10

Ne

Neon

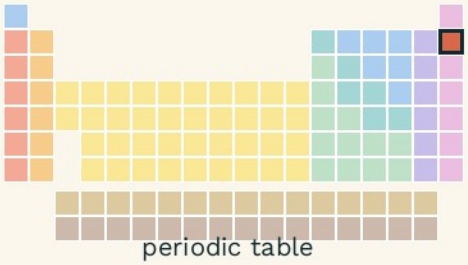

WHERE YOU FIND IT

- Glowing red-orange signs
- Some lights in shop windows
- Tiny amounts in the air

WHAT IT DOES FOR US

When electricity flows through neon gas inside a glass tube, the gas glows bright red-orange. Other gases give other colors.

WHERE IT SITS

periodic table

FUN FACT

Neon almost never joins with other elements, so it is called a noble gas.

SAFE TO KNOW

Neon tubes are glass: handle with care and never touch a lit sign, because the transformer uses high voltage.

Adults: never let children mix, heat or taste chemicals.
