Mixed Operation Pyramids

Free sampler · 6 puzzles · answers on the last page

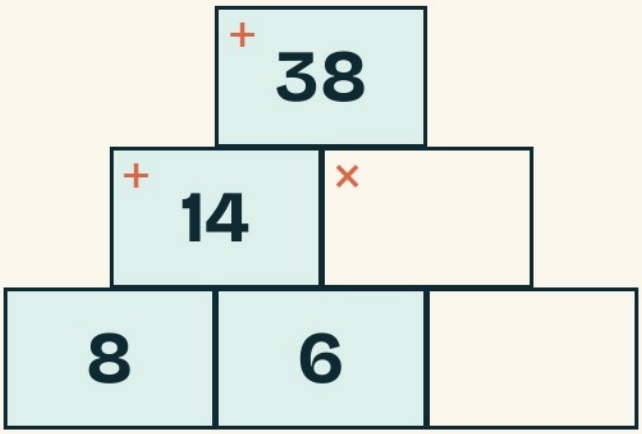

Each brick is made from the two bricks under it using the sign printed in its corner: left brick, sign, right brick. Every bottom brick is a whole number from 1 to 9. Fill every empty brick.

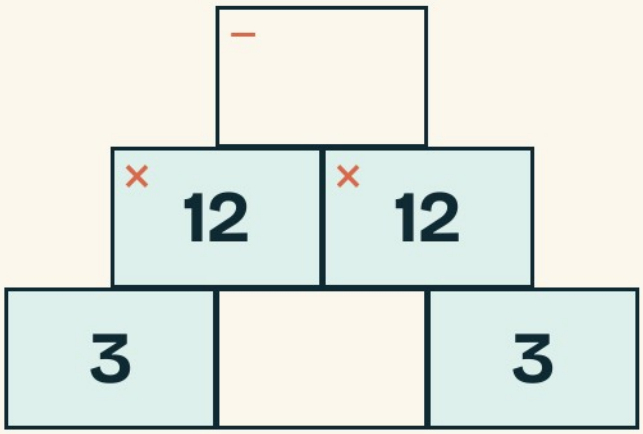

Worked example. The top brick is left − right: 6 = 12 − ?. To undo a take-away, take the answer from the left brick: ? = 12 − 6 = 6. The left brick of row 2 is 3 × ? = 12. To undo a times, divide: ? = 12 ÷ 3 = 4.

Hint: undo the sign. Plus is undone by minus, and times is undone by divide.
