Symbol Pyramids

Free sampler · 6 puzzles · answers on the last page

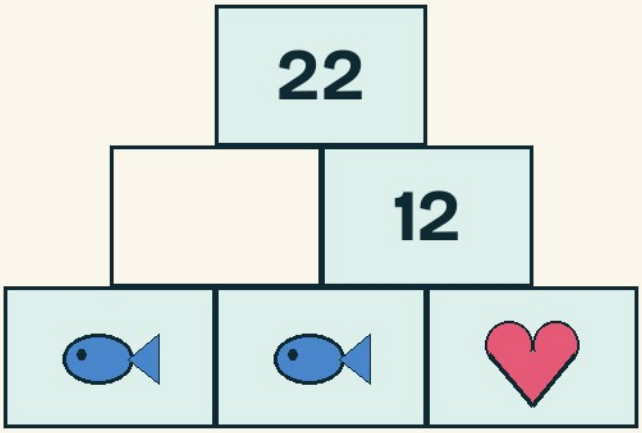

Each brick is the sum of the two bricks under it. Each picture is a whole number from 1 to 9, and the same picture is always the same number. Different pictures may share a number. Work out what each picture is worth.

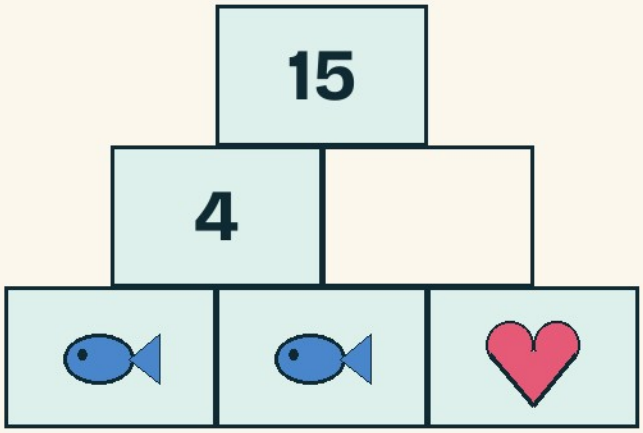

Worked example. The right brick of row 2 is two hearts: heart + heart = 10. So a heart is 5, and both hearts in the base are 5. The left brick of row 2 is star + heart = 8. A heart is 5, so star = 8 − 5 = 3.

Hint: a row with a repeated picture is the quickest place to start.
